What We Look At?

The qualitative rating of a fund is a function of the Research IP Research Factor Weighting process, which incorporates the following:

Meet the Manager

Generate is an award-wining New Zealand owned KiwiSaver and Managed Funds provider. Their vision is to be the first choice for investors and advisers in relation to KiwiSaver and wealth products. They strive to provide strong long-term performance through responsible investments coupled with excellent service.

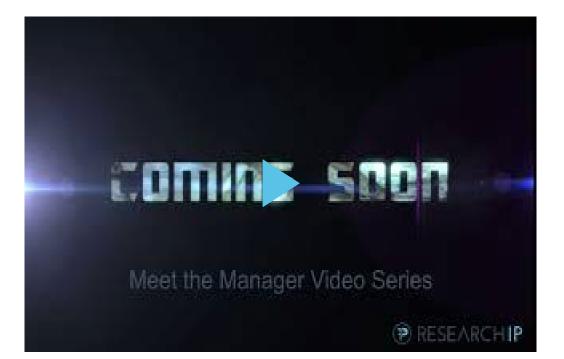

Generate ranked as a top provider in Consumer NZ's KiwiSaver Customer Satisfaction survey 2022, and they have won a number of awards including best KiwiSaver service at the Quality Service Award 2022 and the Adviser's Choice award for KiwiSaver at the Research IP Fund Manager of the Year Awards 2021. They have also been awarded a Gold rating every year for the last six years, in SuperRatings unique value for money assessment. Further information on the Manager can be found in its <u>online profile</u>.

Generate's <u>investment philosophy</u> is that markets are not always efficient at pricing securities, especially over long-time horizons, and that an actively managed portfolio of diversified assets can exploit these inefficiencies.

Generate's funds have been recognised officially as 'Mindful Funds' and have some of the lowest levels of investment in 'issues of concern' on the Mindful Money website. Generate have been a signatory to the United Nations Principles of <u>Responsible Investment</u> (UNPRI) since 2018, and they incorporate negative screening and ESG policies into their security selection process. Generate promote impact investing and work actively with partners for a more sustainable future. In 2020, they were the first KiwiSaver provider to invest into social housing, with a \$20m cornerstone investment, into bonds that helped build 118 new homes. Generate are also proud supporters of the Live Ocean Foundation.

Generate manages six KiwiSaver Funds and three Managed Funds, including:

- Generate KiwiSaver Defensive Fund
- Generate KiwiSaver Conservative Fund
- Generate KiwiSaver Moderate Fund
- Generate KiwiSaver Balanced Fund
- Generate KiwiSaver Growth Fund
- Generate KiwiSaver Focused Growth Fund
- Generate Conservative Managed Fund
- Generate Balanced Managed Fund
- Generate Focused Growth Managed Fund

Key Takeouts

This is General Advice only and should be read in conjunction with the Disclaimers, Disclosures and Warnings at the end of this document.

The Fund

| Fund Details | Generate KiwiSaver Moderate Fund |
|-----------------------------------|--|
| Investment Objectives | The Fund aims to provide a moderate investment return over the long-term through investment in a portfolio of actively managed cash, fixed interest, property and infrastructure assets, Australasian equities and international equities. |
| Benchmark | The benchmark market index for the Fund is a composite benchmark. This is determined by using the benchmark market index for each asset class and combining the index returns based on the Funds' Target Asset Allocation weighting to each asset class for the relevant period. Cash – S&P/NZX Call Rate Deposit TR Index Fixed Interest – 80% S&P/NZX Investment Grade Corporate Bond TR Index, 20% S&P/ASX Corporate Bond 0+ NZD Hedged Index Property & Infrastructure – 40% S&P/NZX All Real Estate industry Group Gross with Imputation Index, 60% S&P/NZ50 Index Gross Australasian equities – 50% MSCI World ex Australia Net TR 100% hedged to NZD DHED, 50% MSCI Daily TR Net World Ex Australia USD |
| Alpha Objective | N/A |
| Management Fee | 1.141% management fee |
| Performance Fee | No performance fee |
| Estimate of Total Fund Charges | 1.14% (ex GST) – 2 December 2022 PDS |

The Generate KiwiSaver Scheme Moderate Fund (formerly the Conservative Fund) ("the Fund") is actively managed and invests in cash, fixed interest, property and infrastructure assets, Australasian equities and international equities.

Volatility is likely to be lower than the Growth & Focused Growth Fund. Long-term returns are likely to be lower than these funds due to lower weighting of growth assets.

| Factor | Lower Limit | Upper Limit | Reference |
|-----------------------------|-------------|-------------|-----------|
| Growth Assets | 25% | 55% | 40.0% |
| Property and Infrastructure | 0% | 30% | 12.0% |
| Australasian equities | 0% | 30% | 12.0% |
| International equities | 0% | 30% | 16.0% |
| Income Assets | 45% | 75% | 60.0% |
| Cash | 0% | 50% | 5.0% |
| Fixed Interest | 35% | 75% | 55.0% |

Each fund has a long-term target investment mix. The actual investment mix will vary from the target investment mix as we pursue tactical investment opportunities, or as we seek to protect asset values in periods of market volatility.

Specific unanimous Investment Committee (IC) approval is required to move outside a 15% +/- 'tolerance range' on either side of the Target Asset Allocations. As an example, in order for the Fund to hold more than 70% (that's 55% plus 15%) in fixed interest the Investment Executives (IE) would need unanimous IC approval. Aside from this, the Manager may change the Target Asset Allocations with prior unanimous approval from the IC.

Using this Fund

The Fund is diversified across different asset classes with relatively broad asset allocation ranges around the target weightings. The Fund's asset allocation decisions can have a material impact on performance, as well as security selection. It is important to note that the asset mix and hence the risk profile of the fund can change over time.

The Fund is subject to fixed interest and equity market risk and movements (both positive and negative) in both the prices of fixed interest securities and share prices of the underlying securities in the portfolio. Accordingly, investors should therefore be aware that the Fund may experience periods of negative returns and that there is a risk of potential capital loss being incurred on their investment. Research IP believes the Fund is suitable for investors with a time horizon of at least 3 years.

Investors should be aware of the rules surrounding KiwiSaver investments before investing. These are disclosed in the <u>Product Disclosure Statement</u>.

| Insight Who is accountable for managing the fund? Is the investment teams work history relevant to the funds they manage? | Manager viewSam GoldwaterSam has 24 years of financial markets experience. Locally he worked in fixed income sales and trading for the National Bank of New Zealand Treasury, co-managed the bond desk at First NZ Capital, and immediately prior to Generate led the investment management of a sizeable portfolio of family assets. He also worked for three years in London in fixed income trading and origination. Sam co- founded Generate in late 2012.Daniel FrostDaniel has worked in the financial markets for over 20 years in a variety of roles. He began his career as a fund analyst at an independent research house before spending a decade working as a domestic equity analyst and then as a portfolio manager at a funds management firm. After a two year stint in London working for a specialist consulting firm advising charities on investment strategy and manager selection, Daniel shifted back to NZ and spent five years working at an investment bank in an equities research role before joining Generate in early 2018.Andrew Bolland Andrew has over 10 years investment | Research IP opinion The Manager employs a collaborative approach to the management of the Fund, though ultimate accountability lies with Sam Goldwater. Analysis and management of underlying asset classes are assigned to key individuals as follows: Australasian equity, property and infrastructure is the primary responsibility of Daniel Frost and Andrew Bolland. Fixed interest is the primary responsibility of Ayrton Oliver. Goldwater was previously in charge of fixed interest and continues to add his experience in this space where needed. International equity is the primary responsibility of Goldwater but is assisted by Warwick Simons of WS Portfolio Advisory LLC (an SEC-regulated Registered Investment Advisor) sub -portfolio manager of global equities, and other members of the investment team including two new global equity analysts. Additionally, Nathan Field will be added to the global equity team as Portfolio March 2023. |
| | Andrew has over 10 years investment experience. Prior to joining Generate, Andrew spent more than 6 years at Salt Funds Management leaving in 2019 as a Senior Analyst and Associate Portfolio Manager. Salt | added to the global equity team as Portfolio Manager in March 2023. The overall structure of the investment team is relatively flat. The overseas experience of key individuals and skills acquired in different |
| | Funds Management was formerly the inhouse equities team at Westpac New Zealand/BT Group during which time Andrew was a Quantitative Analyst. Andrew's investment career began with Westpac in 2010 as one of three to be selected to take part in the graduate programme within the Private, Wealth and Insurance division. <u>Avrton Oliver</u> Ayrton has over 8 years investment experience. Prior to joining Generate in 2021, Ayrton was Vice President in the portfolio management team at JP Morgan in London which managed the bank's non-US FX and interest rate risks. Ayrton's investment career began with the graduate trader programme at Citi Group in Sydney before transferring to the | parts of the investment industry is a positive. At present the coverage across the Manager's funds is manageable though as the size of funds under management grow the investment team will need to expand. Naturally this will be a challenge, though Research IP believes the Manager is well- equipped to grow the team when needed. Recent hires in risk and compliance have demonstrated the ability of the Manager to attract experienced professionals in the New Zealand market. As mentioned above, the Manager also hired two new global equity analysts in December 2021 and appointed WS Portfolio Advisory LLC as sub-portfolio manager. |

| | JP Morgan role initially based in Sydney before shifting to London in 2017. Warwick Simons (WS Portfolio Advisory LLC) Warwick has 16 years of professional investment experience, in addition to five years of strategy consulting experience at Bain & Company. Warwick started his investment career in 2006 as an analyst at a global equity fund based in London. He has also worked in investment research roles for Goldman Sachs in Hong Kong, and two smaller investment research businesses. Warwick is based in Seattle, USA, where he established WS Portfolio Advisory LLC, an SEC- regulated Registered Investment Advisor. He began advising Generate on global investments in early 2021, and WS Portfolio Advisory LLC is now a sub-portfolio advisor for Generate's global direct investments. Warwick is a proud New Zealander despite his global travels, with degrees in Finance and Law from The University of Auckland, and an MBA from INSEAD in France. Generate has an Investment Committee (IC) which is made up of experienced investment professionals. The IC is responsible for overseeing investment decisions made by the Investment Executive. | Further accountability outside day-to-day management of the Fund lies with the Investment Committee. Goldwater is a member and is accompanied by Henry Tongue (CEO and co-founder) and two independent members, Peter Brook and Nick Bowden. Both Brook and Bowden have over 20 years' experience across different facets of the investment industry. |
|--|---|---|
| Has the CIO/ PM personally invested in the Fund? Are they paying the same fees as other investors? | Is the PM invested in the Fund? Yes Is the CIO invested in the Fund? Yes Is the broader team invested in this Fund? Yes Are they paying the same fees? Yes | Alignment of interest between the Manager and investors is important for the long-term management of any investment portfolio. Generate demonstrate strong alignment through personal investments in the Fund alongside investors at the same fee rate. Research IP believe Goldwater and Tongue demonstrate a genuine drive to provide a reliable option for investors in the New Zealand market. |
| Why would you allocate to this fund? | Generate is a New Zealand owned and operated specialist investment manager. The fund is actively managed, has a Responsible Investment Policy which integrates environmental, social and governance issues as part of the investment process. Generate believes that proactively managing ESG issues will deliver stronger long-term investment returns. We also offer good customer service and advice (via financial advisers) with over 95% of our members joining through an adviser. Research conducted by the Financial Services Council in 2020 showed that "New Zealanders | The Manager takes an active approach to investment management with an emphasis on net of fee returns for investors. The assets are managed 100% internally for this Fund. The Manager has the ability to employ tactical asset allocation. The tolerance range around long-term targets allowed is +/- 15%. This enables the Manager to vary the asset holdings if it is believed the assets are under- or overvalued. For example, the Manager has remained underweight listed property since 2018, though the size of this underweight has varied from approximately <1% to 4%. |

| that get professional financial advice tend to be higher earners and are financially stronger. They have: • 50% more in their KiwiSaver • 50% more of their earnings" • Save 3.7% more of their earnings" • https://blog.fsc.org.nz/research-2020-literacy- insight-adviceThe Manager employs a broad approach to responsible investing. Research IP believes this is another distinction in the KiwiSaver market which the Manager's approach to responsible investing is discussed below, see the response to "Describe the Manager's ESG, Corporate Sustainability policies and engagement".What are key factors in the buying and selling decisions of the Fund?The manager actively manages all assets. Generate believes the incorporation for ESG analysis is important because it can enhance the risk-adjusted returns of our funds by incorporating ESG analysis into our process thereby taking a more holistic investment approach. More specially, there is a high likelihood that environment, social or governance deficiencies will eventually translate through to lower cashflow generation. In the meantime, there is a aignificant risk that these businesses will attract a higher cost of capital.The Manager employs a broad approach to responsible investing. | We have a two-part approach to responsible investment which reflects differing levels of control we have between internally and externally managed money. We have less control over externally managed money and thus use an exclusion approach. This is complemented by the inclusion of a review of managers' responsible investment approaches during the selection and monitoring process. More specifically, there are two levels to our responsible investment approach. The first is that all of our investments are subject to a negative screen (i.e. those held directly in portions of the portfolio managed internally as well as those included in funds the portfolios invest inj. Specifically, investments into companies involved in the following activities are excluded: cluster munitions, anti-personne mines, chemical weapons, nuclear warheads, whaling and manufacture of tobacco. Second, we have an additional level of ESG analysis for investments managed internally. As part of our fundamental bottom-up research on companies used to select equities directly, we assess their ESG risks and performance. The assess their ESG risks and performance. |
| focus of our analysis differs depending on what are judged to be the key issues facing a // e strongly recommend that potential investors read the Product Disclosure Statement or Information Memorandum. This information must be read in conjunction with the |

| \bigcirc | RESEARCHIP |
|------------|------------|
|------------|------------|

| | company. For ESG factors we use the SASB materiality map as a starting point of identifying the key factors to focus on. Typical issues that are researched include carbon emissions, environmental impacts, employee health and safety, board and senior management diversity, the incentive structure for senior management and the board and finally a past examples of poor governance. | sustainable a stock's potential growth might be. The strength of a company's capital position will also be assessed at this point. Top-down analysis takes into account tailwinds or headwinds in certain sectors. Research IP highlights the healthcare and technology sectors which have historically held significant weightings in the portfolio. |
|--|---|--|
| | The manager ensures the Fund's investments are within the investment concentration limits set out in the SIPO. Liquidity risk is managed by considering the liquidity of each individual security and in turn the overall composition of liquidity available in the portfolio relative to the funds' investor profile. Further Generate regularly monitors any changes to portfolio liquidity requirements. | Sell decisions within the portfolio are taken on a case-by-case basis. These will chiefly be based on risk and reward. The Manager will make assessments on bottom-up or top-down factors. For example, valuation of specific stocks has propelled the Manager to trim or sell out of positions. Poor governance has forced the Manager to sell out of a stock in the past. A poor performing stock that continued to increase remuneration for Senior Management also provided a reason for the |
| | Currency exposures are actively managed by deciding whether to fully or partially offset the impact of currency movements by entering into foreign exchange transactions. | Manager to sell down a position in the portfolio. Analysis at the sectoral level, as well as a focus on the allowable asset allocation ranges each day also prompts the Manager to reposition the portfolio. |
| | Position sizes are determined by the expected level of return and volatility. Generate makes buy and sell decisions at any point in time based on the risk/reward on offer. This view is formed on the basis of the current market conditions that are present at any given time and how those may affect an investment's prospects. This is usually the result of a potential event being identified to either improve or deteriorate an investment's cash flow potential. Alongside these potential market/investment events, valuations are constantly reviewed on both a relative and absolute basis. Where valuations are deemed to misalign with an investment's prospects, a decision to buy or sell may be made. | Research IP highlights the unanimous approval needed from the IC if the Manager wishes to move outside the +/- 15% tolerance range around target asset allocations. The tolerance range of +/- 15% applies to the "Reference" percentages noted in the Factor table within <u>The Fund</u> section of this report. Within this table the Manager also specifies hard limits on the underlying asset classes outside which there is no tolerance to move. |
| What are the key drivers of the Fund's performance? | Asset allocation of the Moderate fund is the key driver of performance. The fund has a long term, target allocation of 40% to growth assets split between domestic equities (long-term target of 24%) and international equities (long-term target of 16%), therefore, the performance of domestic and global share markets are a key determinant of returns for the fund. This fund also has a long term target allocation of 55% to income assets, and so moves in interest rates and the performance of credit spreads are also contributors to returns for the fund. | Research IP believes the key driver of performance across the portfolio will be from the allocation to equities (40% target weighting). Within the equity allocation to Australasian equities (including property and infrastructure) the bias will consist of earnings quality and yield factors. The Manager takes an active approach, so stock selection will drive a significant portion of the Fund's performance over the long-term. The international equity allocation has a |
| | | growth bias through the Manager's allocation |

| | The fund aims to provide a moderate investment return through investment in a portfolio of actively managed cash, fixed interest, property and infrastructure assets, Australasian equities & international equities. Long-term returns are likely to be lower due to the lower weighting of growth assets. | to stocks like Microsoft, Visa, Alphabet, and Thermofisher. Unlike the Manager's other KiwiSaver funds, this Fund does not allocate to external fund managers. |
|--|--|---|
| What are the risks of investing in this Fund? | The Moderate fund's key risk is share market risk due to the allocation to domestic and international equities. It has a long term target allocation of 12% to Property & Infrastructure and 12% to Australasian equities (the fund's domestic sharemarket allocation) and 16% to international equities. An exposure to interest rates and credit spreads is also present in the fund. Should interest rates sharply or materially go up, given the weight of income assets in the fund, this could have a negative impact on performance. Additionally, should credit spreads widen this could have a negative impact on performance. Generate seeks to manage these risks through active duration management, comprehensive due diligence and credit diversification. Short duration income assets have a lower sensitivity to interest rate moves. The long term target allocation to international equities also exposes the fund to foreign exchange risk. Generate actively manages this risk around a 50% hedge position. We believe that hedging half the currency risk minimises risk in the long run, because when global equities underperform so does the NZ dollar, which acts to cushion these declines | The Manager has a specific set of policies to help manage risk within the portfolio. These are documented within the <u>Statement of</u> <u>Investment Policy and Objectives</u> . Section 5 addresses portfolio risk considerations such as concentration of investments, liquidity, rebalancing, and hedging. Research IP highlights the majority of risk within the portfolio will emanate from the allocation to equities. The Manager has the ability to use futures or options to manage risk here but has not used this approach to date. Instead, the Manager will lighten the weighting to equity if they thought risk was becoming elevated in share markets. Goldwater makes a concerted effort to focus on asset allocation and currency exposure on a daily basis. The Manager is very active with respect to foreign exchange hedging. The long- term target for currency exposure is 50% from which the investment team is able to deviate by +/-15%. Regarding diversification between asset classes, Research IP notes there is no allocation to global fixed interest in the Fund at present. However, the Manager does have the ability to allocate to global fixed interest if need be. Research IP believes this asset class can provide a wider opportunity set to manage risk within the portfolio, particularly in a diverging global inflationary environment. |
| On what basis are the fees charged justified? | We have provided a great product with high levels of service to our members. The Moderate Fund has consistently been one of the top performers amongst its peers and Generate has invested heavily to provide market leading customer service. We monitor the competitive landscape. Our fees have been trending lower in recent years as we enjoy the benefits of scale. Members pay "other administration charges" | Research IP believes the Manager is transparent from a fees perspective. Fees are disclosed in the <u>Product Disclosure Statement</u> , with additional information in 'Other Material Information'. The Manager does not include GST within total Fund charges. Research IP notes this is a common occurrence amongst New Zealand fund managers. More transparency on fees is provided in the Manager's <u>RIPPL Effect report</u> . Research IP observes that the manager's basic |
| | that help Generate cover the cost of various administrative functions. | fee is in the higher half compared to sector peer relevant funds in New Zealand. The total |

| | | fund charges is also in the higher half compared to sector peer relevant funds in New Zealand. There is likely to be periodic differences between market participants due to the disclosure requirements in New Zealand surrounding "management fees", "other administration charges", "performance fees" and "underlying fund fees". |
|--|--|--|
| Describe the quality of the organisational and investment governance processes? | Generate has an Investment Committee (IC) which is made up of experienced investment professionals. The IC is responsible for overseeing investment decisions of the Fund. The IC keeps an Approved Issuer List (AIL) of all the assets that the Fund can invest into (excluding cash and cash equivalent). In order for a new asset to be added to the AIL it must receive unanimous approval from the IC. Once unanimous approval has been received the new assets are able to be added to the AIL. In addition Generate executes trades via the Bloomberg end-to-end Order Management System (OMS) which has a compliance module that monitors and implements pre and post trade functionality. The OMS is used as a key method of confirmation and communication between the investment team, the Custodian and the Administrator. | The Investment Committee (IC) and Investment Executive (senior members of the investment team) meet every two months. Henry Tongue and Sam Goldwater are part of both groups. Peter Brook and Nick Bowden are the other two Investment Committee members. Each stock available to the investment team to potentially invest in must be pre-approved by the IC (i.e., the approved issuer list). Research IP believes this has the potential to restrict the agility of the Manager, though this is alleviated somewhat with the ability of the IC to consider new investments outside the approved issuer list through circular resolution via email. Thus meaning that there is so no need to wait every two months for the meeting between the IC and Investment Executive. |
| | All trades executed/transacted are entered directly into the OMS by the Investment Manager Investment Operations checks the trades against broker Contract Notes and releases them in the OMS downstream to the Custodian and Administrator for settlement Positions are reconciled daily (within the OMS) between Generate, the Custodian and the Administrator Pre and post trade compliance is monitored (within the OMS) by the Compliance Department | Further to this, there are specific approvals needed from the Supervisor (Public Trust) for unlisted property and infrastructure. An example of this was the Manager's investment into a property fund in 2020. The allocation to unlisted investments will increase the liquidity risk in the portfolio, however the overall allocation to unlisted securities is expected to be low. Further to this, the investment team monitors the overall Fund liquidity to ensure taxation payments, withdrawals, fees and expenses can be met during normal market conditions. |
| | Is there separation of duties? Yes Generate Investment Management Limited (GIML) is licensed under the Financial Markets | Research IP highlights the addition of the Bloomberg AIM tool to help manage risk through the investment process. Whilst it is early days in terms of usage, Research IP believes this is a positive step to maintain oversight of risk in the portfolio. |
| | Conduct Act as a Managed Investment Scheme Manager. GIML is the manager of the Generate KiwiSaver Scheme and the Generate Unit Trust Scheme. A board charter sets out the roles and responsibilities of the board and directors and how they can delegate to management and sub-committees. The Board is responsible for the governance and control of Generate's activities. This includes the approval of | Investment team meetings take place throughout the week. Alongside this, less formal discussions around positions in the Fund and ideas occur with frequency due to the team working together in the same room. The Manager is transparent with respect to key organisational parties governing the Fund |
| | activities. This includes the approval of strategy, key policies and procedures, financial potential investors read the Product Disclosure Statement or Informatic | key organisational parties governing the Fund. |

| | | RESEARCHIE |
|--|--|--|
| Describe the | reporting, compliance and risk management. The board has established two standing committees to assist with the delivery of these activities: (a) the Compliance Committee, which is responsible for all legislative, regulatory, supervisory and internal compliance requirements and (b) the Investment Committee, which is responsible for investment strategy and policies. | Further information is disclosed within the ' <u>Other Material Information</u> ' document. |
| Manager's ESG, Corporate Sustainability policies and engagement. | Is ESG integrated into the process? Yes Do you use a third-party provider? Yes, Bloomberg Are positive or negative screens used? Yes Integrated ESG for internally managed assets and negative screen across entire portfolio Is the business a signatory to the UNPRI? Yes What is the rating? B Does the business have a CSR policy? Generate takes into account ESG and CSR issues which include but are not necessarily limited to: Environmental issues for consideration relate to the quality and functioning of the natural environment and natural systems. These include excessive and harmful: pollution, resource depletion, use of toxic chemicals, and the endangerment of animal species. Governance issues for consideration relate to the governance of companies. These include strong governance structures, appropriate executive control and high levels of transparency. Governance is concerned with the way organisations are governed, as distinct from the way businesses within those companies are managed on a day-to-day basis. Social issues for consideration relate to the rights, well-being and interests of people and communities. These include human rights, health and safety, child labour, community relations and respect for the rule of law. | The Manager employs multiple approaches with respect to responsible investing: integration of environmental, social and governance considerations within the investment process; corporate engagement and proxy voting; and screening. Exclusions include: The manufacture of cluster munitions; The manufacture of anti-personnel mines; The manufacture or testing of nuclear explosive devices; The processing of whale meat; The manufacture of tobacco. Screening takes place four times a year and applies to direct investments as well as investments via underlying funds across the suite of funds. One benchmark for exclusions in New Zealand is the NZ Super Fund exclusion list; the Manager is in line with the majority of these. Research IP believe that being a PRI signatory should be considered a bare minimum in this day and age for any fund manager with a focus on environmental, social and governance investment considerations. Proof of the pudding in responsible investing needs deeper evaluation. Research IP believes that fund managers with an ESG focus should be giving attention to the underlying factors of a company that will ultimately benefit stakeholders and create value. In other words, negative screening is not a comprehensive approach by itself to invest responsibly. The Manager provides transparency for investors wishing to evaluate their ESG approach. The Manager's Responsible Investing Investment Policy is available here. |
| We strongly recommend that | potential investors read the Product Disclosure Statement or Informatic | August each year and can be searched at this |

| | | RESEARCH IP |
|--|--|---|
| | | link. The Manager's most recent reports can beviewed at the links below:-2020 Transparency report; and-2020 Climate Transparency report. |
| | | Research IP commends specific actions taken by the Manager in implementing the responsible investment policy to date. The following examples demonstrate the active approach applied by the Manager: Signatory to a collaborative engagement to encourage Facebook, Alphabet and Twitter to strengthen controls to prevent the livestreaming and dissemination of objectionable content. Significant investment in a community bond where proceeds will be used for specific public housing projects. |
| | | Research IP believes over time, as the total funds under management grows, the Manager will need to invest in further resource to maintain an active approach to responsible investment. |
| Is there alignment with the interests of investors through ownership of | Part of the remuneration is a discretionary bonus which is subject to the performance of the investments. Majority of the investment team are invested in the funds and all own equity in the manager. | Research IP believe staff equity ownership of the Manager is evidence of a strong alignment of interest with investors. Research IP highlights that each of the key individuals accountable for the management of this Fund are shareholders. |
| the Manager and/or remuneration of the investment team? | Privately owned. Privately Owned (significant employee ownership)? Yes | Additionally, there is alignment between the bonus component of staff remuneration and the performance of the funds/portfolios. |
| Comment on the assets under management, flow and capacity? | What is the FUM in this Fund? \$469,255,017 What is the FUM in this strategy (total inc insto mandates)? \$469,255,017 What is the FUM of the manager? \$3,279,364,336 | The Manager has experienced growth in assets under management over the previous year, underpinned by regular KiwiSaver member contributions, though market returns reduced this value somewhat. Total members in the Fund have grown from approximately 10,000 in 2018 to 22,000 in 2022. |
| | The fund has decreased 10% in the past 12 months to 30 September 2022 with an annual return of -7.38% (after deductions for charges but before taxes) and with net fund outflows of \$15.4m. Generates' total FUM has grown 2% in the past 12 months. | Research IP believes the Manager has sufficient resource to be able to manage the Fund adequately at present. Further resource is warranted as total FUM grows across the suite of funds offered. |
| | | As the Fund grows Research IP believes the Manager will benefit from economies of scale in regard to the international equity allocation. Research IP believes the team will need to grow to adequately manage the direct |

About Research IP

Research IP has provided client focused qualitative and quantitative financial product and security research since 2015. Research IP was also the consultant to the NZX wholly owned subsidiary FundSource, providing investment research to the New Zealand market since 2015.

Research IP is a specialist investment research provider which is used and trusted by investors & financial advisers for investment, KiwiSaver, Superannuation and other Pension schemes throughout the Asia Pacific region.

Research IP has grown its team and footprint by utilising the specialist skills of its analysts which include;

- data scientists,
- equity, bond and alternative asset specialists
- portfolio managers
- asset allocation analysts
- and ratings specialists.

Our experience has been gained in well over 20 years of roles across different facets of the industry, so we understand the key drivers and challenges for managers, as well as the impact for investors and the Financial Advice industry.

By leveraging the skills of specialists, Research IP is able to provide innovative and tailored financial services solutions to the marketplace. Client focused outcomes are underpinned by the belief that the role of business model innovation and accelerating technological change opens up new possibilities, to put client interests at the centre of the financial services industry focus. We have strong philosophical alignment with John Hagel's work on the possibilities for "Disruption by Trusted Advisors" and John Kay's views in "Other People's Money: Masters of the Universe or Servants of the People".

Research IP delivers high quality quantitative and qualitative fund research to financial advisers and the broader financial services industry. Research IP works with a number of expert providers to source this data. Quantitative data is supplied by a variety of sources, including directly from the Fund Manager, while qualitative research is provided by Research IP.

Disclaimers, Disclosures and Warnings

RESEARCH IP STRONGLY RECOMMENDS THIS DOCUMENT BE READ IN CONJUNCTION WITH THE RELEVANT PRODUCT DISCLOSURE STATEMENT OR INFORMATION MEMORANDUM.

IMPORTANT NOTICE: This document is published by Research IP Pty Ltd (Research IP) ABN 81 602 947 562, a Corporate Authorised Representative of AUSTRALIAN WEALTH HOLDINGS PTY LTD, AFSL 481674. Research IP is also a registered Financial Services Provider (FSP) in New Zealand : 710351. Please read the following before making any investment decision about any financial product mentioned in this document.

Disclosure at the date of publication: Research IP may have received a fee from the fund manager or product issuer(s) for researching the financial product(s) set out in this document, using objective criteria. Research IP may also receive a fee from the fund manager or product issuer(s) for subscribing to research content and other Research IP services. Research IP's fee is not linked to the rating(s) outcome. Research IP and/or its representatives and/or their associates may hold the product(s) referred to in this document, but details of these holdings may not be known to the Analyst(s). Research IP considers such holdings not to be sufficiently material to compromise the rating.

Disclosure of Investment Consulting services: Research IP may receive fees for providing investment consulting services to clients, which includes constructing model portfolios and approved product lists. Research IP may also receive fees from a fund manager or product issuer for consulting services. The investment consulting services are carried out under separate arrangements and processes to the research process adopted for the review of this financial product. Policies are available on request.

Warnings: This report does not constitute a recommendation to purchase, redeem or sell the relevant financial product(s). Before making an investment decision based on the rating(s), the reader must consider whether it is personally appropriate in light of his or her financial circumstances or should seek financial advice on its appropriateness. If the information in this report leads to the acquisition or possible acquisition of particular financial product(s), the reader should obtain and consider the Product Disclosure Statement, Information Memorandum, or Prospectus for each financial product before making any decision about whether to acquire a financial product. Research IP's research process relies upon the participation of the fund manager or product issuer(s). Should the fund manager or product issuer(s) no longer be an active participant in Research IP's research process, Research IP reserves the right to withdraw the document at any time and discontinue future coverage of the financial product(s). The rating in this publication relates to the fund outlined which may have related funds or be associated with other funds and platforms. The rating may only be applied to the fund outlined in this publication in relation to the related or associated funds and platforms. You should be investigated by your financial adviser before you make an investment decision in relation to the related or associated funds and platforms. You should be aware that the mandate, fees, underlying investments, the issuers of the related and associated funds and platforms may be different from the fund specified in this publication. You should satisfy yourself that the related and associated funds and platforms meet your financial circumstances, needs and objectives before making an investment decision.

Disclaimer: This document is for the exclusive use of the person to whom it is provided by Research IP and must not be used or relied upon by any other person. No representation, warranty or undertaking is given or made in relation to the accuracy or completeness of the information presented in this document, which is drawn from public information and third party sources, including fund managers, and is not necessarily verified by Research IP. Financial conclusions, ratings and advice are reasonably held at the time of completion but subject to change without notice. Research IP assumes no obligation to update this document following publication. Except for any liability which cannot be excluded, Research IP, its Directors, officers, employees and agents disclaim all liability for any error or inaccuracy in, misstatement or omission from, this document or any loss or damage suffered by the reader or any other person as a consequence of relying upon it.

Copyright ©2021: This report is subject to copyright of Research IP. Except for the temporary copy held in a computer's cache and a single permanent copy for your personal reference or other than as permitted under the Copyright Act 1968 (Cth). No part of this report may, in any form or by any means (electronic, mechanical, micro copying, photocopying, recording or otherwise), can be reproduced, stored or transmitted without the prior written permission of Research IP. This report may also contain third party supplied material that is subject to copyright. Any such material is the intellectual property of that third party or its content providers. The same restrictions applying above to Research IP copyrighted material, applies to such third party content.

Analyst Disclosure and Certification: Analyst remuneration is not linked to the research or rating outcome. Analyst holdings may change during the life of this document. The Analyst(s) certify that the views expressed in this document accurately reflect their professional opinion about the matters and financial product(s) to which this document refers.

For Australian investors and advisers:

Past performance is not a reliable indicator of future performance. Any express or implied rating or advice presented in this document is limited to "General Advice" (as defined in the Corporations Act 2001(Cth)) and based solely on consideration of the investment merits of the financial product(s) alone, without taking into account the investment objectives, financial situation and particular needs ('financial circumstances') of any particular person.

For New Zealand investors and advisers:

Past performance is not a reliable indicator of future performance. Any information, opinions, views or recommendations in this report are 'regulated financial advice' under New Zealand law. Our publications, ratings products and services should be viewed as an additional investment resource, not as your sole source of information. Before making any decision to acquire a particular financial product, you should obtain and carefully consider the relevant product disclosure statement. This report should not be relied upon as a substitute for advice from your financial adviser.

We recommend you obtain appropriate financial, legal and taxation advice before making any financial investment decision.
